Full analysis

Overview

Witty TV is an Italian entertainment and video-streaming platform presenting television programmes, episode listings, editorial highlights, casting content, and promotional programming. Its apparent business model is ad-supported media distribution, supplemented by user accounts and promotional partnerships.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent editorial media service rather than an investment, payment, or credential-harvesting operation; the available analysis found no phishing, brand-impersonation, malicious-form, or wallet-interaction indicators. The domain also shows sustained historical continuity and a clean external reputation, which materially supports the conclusion that this is an established site rather than a recently created impersonation. The operator's real-world identity remains likely rather than independently verified, so the legitimacy conclusion is evidence-consistent, not identity-proven.

EVIDENCE

- Domain registration: 2013-01-11, approximately 13.59 years old, according to the registration record.
- Web history: 3,048 archive snapshots spanning 2013–2026, with 14 years tracked.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and no blacklist result.
- Homepage analysis identified no phishing indicators, hidden forms, or suspected brand impersonation.

Regulatory Verification Notes

The site is presented as an entertainment and editorial video platform, not as a financial, investment, or otherwise regulated service. No licensing claim or license number is identified in the supplied site evidence; this is a limited disclosure point for any activity that could extend beyond ordinary media consumption, rather than evidence of a scam. The registration record names Telecom Italia s.p.a. as registrar and associates the domain with Riccardo Bartoletti and FASCINO PRODUZIONE GESTIONE TEATRO S.R.L.; those records support continuity but do not independently establish the current operating entity. A third-party broker-data check produced no match, which is contextual reputational support only and not a regulatory determination.

EVIDENCE

- Network service: served from AS13335 (CLOUDFLARENET — Cloudflare, Inc.).
- Transport encryption: TLS certificate issued by WE1, validation level DV, valid to 2026-10-19.
- Registration record: registrar Telecom Italia s.p.a.; expiration date 2027-02-25.
- Homepage content identifies an entertainment/media service with advertising and cookie-consent functionality, not a regulated financial offering.

What to Verify Next

Before credential or payment interactions, independently confirm the legal entity responsible for the relevant service and review the applicable terms, privacy, return or refund arrangements, and payment-protection provisions. Official social channels linked from the site can be cross-checked through independently sourced accounts, and any newly introduced regulated or paid activity should be confirmed with the relevant authority or merchant registry.

EVIDENCE

- Homepage account functions include profile and saved-list features, making the applicable account and privacy terms relevant to review.
- Homepage links to Facebook, X, Instagram, and TikTok provide channels for independent consistency checks.
- The stated business model includes advertising and promotional partnerships, so payment-protection checks should be applied if a commercial transaction is presented.

Summary Verdict

The overall posture is high trust and low risk. Available evidence is consistent with an established, apparently legitimate media website, with no observed scam or impersonation contradictions. The classification supports ordinary site use, while the operator connection remains probable rather than independently verified.

Infrastructure Integrity

Cloudflare CDN/WAF protection provides a mitigating layer against routine exposure and abuse, although infrastructure protection is not proof of legitimacy. The observed network information includes Cloudflare edge addresses 172.66.174.106 and 104.20.43.95, while the resolved infrastructure also identifies AS3302, Retelit Digital Services S.p.A.; this reflects layered delivery infrastructure rather than a substantive identity finding.

Closing Assessment

Credential or payment use should follow ordinary independent checks of the responsible entity, applicable policies, and payment protections, particularly if the interaction extends beyond standard media viewing.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about wittytv.it at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
