

Is wnacg.com legit? TrustSniffer's high-trust assessment: 90/100

wnacg.com

Verdict

90

OUT OF 100

HIGH TRUST

wnacg.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 75%.

What this site appears to be

A multilingual adult manga / scanlation site listing many translated works and downloadable image packs. Contact email is provided; content appears to be unauthorized translations and downloads. No forms or clear transactional flows detected in the supplied DOM snapshot.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2012.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This website is a multilingual adult-manga portal that presents translated works, scanlation-oriented categories, and downloadable image-pack content for visitors seeking online access to adult illustrated media.

Scam/Impersonation Risk

No contradictions were observed: the available evidence shows no phishing, brand impersonation, malicious blacklist, or confirmed malicious-detection signal. The principal concern is contextual rather than impersonation-based: the homepage presents translated and apparently scanlated works marked for download, including material that may not have transparent rights authorization, while the supplied capture shows no clear commercial transaction flow. That model can expose visitors to uncertain download, advertising, or donation pathways, but it does not establish that the site is a scam. The site's long operating continuity and substantial archived presence are consistent with an established website, while its real-world operator remains independently unverified.

EVIDENCE

- The homepage lists adult manga, translated works, and downloadable image packs, with no login form, sensitive form, or untrusted destination detected in the captured page structure.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and no blacklist or phishing hit for the assessed domain.
- Domain registration telemetry records creation on 2012-02-04, an age of 14.53 years, and registration through NameSilo, LLC.
- Web-archive telemetry records 352 snapshots from 2012-11-20 through 2026-06-06, covering 15 tracked years.

Regulatory Verification Notes

The available evidence is consistent with an established, apparently legitimate content website, but it does not independently verify the operator's real-world identity. The published business model does not present a transparent commercial storefront or a clearly stated licensing authority or registration number for the distributed works; this is a disclosure and rights-verification gap, not evidence of impersonation. A separate broker-reputation comparison produced no match, which is only contextual reputational information and not a licensing or regulatory determination. The site's established domain, clean external reputation, known certificate issuer,

and strong public traffic footprint provide affirmative support for its apparent legitimacy, although the content model is not equivalent to regulated financial or licensed commercial activity.

EVIDENCE

- The site's transport encryption uses a DV TLS certificate issued by WE1, valid through 2026-10-26T03:10:54+00:00.
- The domain is registered through NameSilo, LLC, with an expiration date of 2033-02-04T01:44:39Z.
- The domain appears within the top one million publicly ranked websites, with a recorded rank of 1501.
- The page snapshot contains no stated license authority or license number for the published works.

What to Verify Next

Before credential or payment interactions, an organization should independently confirm the operator's legal identity, establish whether the intended use is permitted in the relevant jurisdiction, and confirm that any payment route provides ordinary consumer protection and dispute rights. If downloads, donations, or other external redirects are used, the destination and file provenance should be assessed separately rather than inferred from the portal's reputation. Official contact channels should also be confirmed through an independent route, particularly where support or rights-related issues arise.

EVIDENCE

- The captured homepage contains no forms or clear transactional flow through which merchant identity or payment protections could be assessed.
- The site's content presentation includes downloadable material, making file provenance and destination-level review relevant to any proposed interaction.
- The available page evidence does not identify a licensing authority or registration number for the distributed works.

Summary Verdict

The website has a **high-trust, low-risk overall posture** with no observed scam or impersonation contradiction. Available evidence is consistent with an established, apparently legitimate site, while the operator's real-world identity is not independently verified and the site's content model warrants ordinary rights and transaction checks.

Infrastructure Integrity

The website is protected by Cloudflare's CDN and WAF, and all observed addresses function as CDN edge infrastructure rather than exposed origin infrastructure. This is a meaningful exposure-mitigation measure, but it is a protective hosting characteristic rather than proof of operator legitimacy.

EVIDENCE

- Served from AS13335, Cloudflare, Inc. (CLOUDFLARENET), US.
- Observed edge IPs include 104.20.44.182, 104.21.41.230, 172.66.175.138, and 172.67.195.153; 8 edge IPs were observed and 0 origin candidates were identified.

Closing Assessment

Normal browsing is proportionate to the assessed posture; independent identity, rights, return-policy, and payment-protection checks should be completed before credentials or payments are submitted.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of wnacg.com.

- The request stayed on wnacg.com. It was not redirected to another domain. CLEAR
- Registration is published under NameSilo, LLC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2033-02-04. CLEAR
- The earliest public archive of this site is from 2012-11-20. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about wnacg.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
