

Is workshopmate.com.au legit? TrustSniffer's high-trust assessment: 100/100

workshopmate.com.au

Verdict

100

OUT OF 100

HIGH TRUST

workshopmate.com.au appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-07-31 by automated analysis. Classification confidence 75%.

What this site appears to be

Workshop Mate is an Australian SaaS platform for managing mechanical workshops. It promotes job and invoice creation, accounting integrations, reminders, inventory, bookings, staff workflows, service histories, onboarding, training, and related business services, and identifies its operator as Jeal Computer Services Pty Ltd with an ABN and telephone support.

Key findings

- Automated classification: Not Scam.
- Public web-archive history exists since 2010.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Workshop Mate is an Australian subscription-based software platform that helps automotive workshops manage jobs, invoices, quotations, accounting integrations, customer reminders, inventory, bookings, staff workflows, and service histories, while also offering onboarding, training, website design, and dealer-management services.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing indicators, or other fraud signals were observed. The domain has a long, continuous history without evidence of repurposing, while external threat-reputation checks recorded no malicious or suspicious classifications. The homepage's coherent commercial proposition, established content structure, and conventional trial and purchasing pathways are consistent with a legitimate SaaS operation.

- Domain provenance records indicate registration in 2010 (~16 years old).
- Web-archive records contain 216 snapshots spanning 2010–2026 (17 years tracked), with no detected semantic drift or suspicious repurposing.
- External reputation telemetry recorded 0 malicious and 0 suspicious classifications, no malicious safe-browsing finding, and 0 reported abuse incidents.
- Homepage behavior testing found no cloaking, hidden forms, suspicious inline scripts, clipboard hijacking, wallet activity, or external password forms.

Regulatory Verification Notes

The homepage identifies the operator as Jeal Computer Services Pty Ltd, provides an Australian Business Number and telephone support, and links to Terms & Conditions and Privacy pages. The registered domain owner independently aligns with that named operator, materially strengthening entity attribution. No financial or investment activity is presented, and the site's workshop-management SaaS model does not create an evident need for broker or financial-services licensing; accordingly, the absence of such a claim is not an adverse signal.

- Domain-registration records name JEAL COMPUTER SERVICES PTY. LIMITED as the owner and Web Address Registration Pty Ltd as the registrar.
- The homepage provides separate pathways for pricing, a 14-day free trial, purchase, product demonstration, login, training, contact, and company information.
- Hosting telemetry shows service from AS8075 (Microsoft Corporation, US).
- The site's transport encryption uses a YR2-issued DV TLS certificate, valid to 2026-09-27.

What to Verify Next

Enterprise procurement should confirm the operator’s Australian registration and current business particulars through the official registry, review the contractual terms and privacy provisions for data handling, retention, security responsibilities, and termination rights, and obtain written confirmation of subscription charges, optional-service fees, migration arrangements, and service-support commitments before deployment.

- The homepage advertises no-lock-in plans, creating a clear basis for confirming cancellation and data-export provisions contractually.
- The site promotes Xero and MYOB accounting integrations, making integration permissions and third-party data flows relevant to security review.
- Published service pathways include optional onboarding, hourly training, data migration, and related business services.
- The homepage provides separate Australian/New Zealand and international telephone-support routes.

Summary Verdict

The website is legitimate, established, and trustworthy. Its corporate identity, sustained provenance, coherent commercial presence, clean threat reputation, and benign observed behavior converge strongly, with no contradictory risk signals identified.

Infrastructure Integrity

The site is protected through a CDN/WAF configuration, and the single observed address was an edge server rather than a confirmed origin. This reduces direct origin exposure and supports operational resilience, although protective infrastructure is a security mitigation rather than independent proof of legitimacy.

Closing Assessment

Normal interaction, including account login, trial registration, purchasing, and standard platform use, is appropriate, subject to ordinary organizational procurement and SaaS due-diligence controls.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	73/100
Identity verification confidence	74%

- Trusted social count=1

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of workshopmate.com.au.

- The request stayed on workshopmate.com.au. It was not redirected to another domain. CLEAR
- Registration is published under Web Address Registration Pty Ltd. CLEAR
- DNS for this domain is served by googledomains.com, across 3 name servers. NOTED
- The earliest public archive of this site is from 2010-08-16. CLEAR
- It is hosted on MICROSOFT-CORP-MSN-AS-BLOCK, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about workshopmate.com.au at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
