

Is wradio.com.co legit? TrustSniffer's high-trust assessment: 95/100

wradio.com.co

Verdict

95

OUT OF 100

HIGH TRUST

wradio.com.co appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-17 by automated analysis. Classification confidence 55%.

What this site appears to be

Editorial landing page for a radio/news site (WRadio/Caracol network) with news listings, program schedule, podcasts, and cookie/consent notices. Primarily ad-supported with links to related media properties.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What wradio.com.co served when TrustSniffer captured it on 2026-08-17. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

WRadio.com.co is an editorial news and online radio portal presenting breaking news, radio programming, podcasts, regional coverage, sports, economy, technology, newsletters, and related media content; its apparent business model is advertising-supported publishing operated within a broader media network.

Scam/Impersonation Risk

No contradictions were observed. The site's content is editorial and informational rather than solicitation-based, with no detected phishing, impersonation, malicious-form, wallet, or credential-harvesting behavior. Runtime observations included suspicious inline scripting and extensive third-party network activity, but these signals are consistent with advertising, analytics, and cookie-consent functions on a media portal and were not accompanied by cloaking, hidden forms, password-exfiltration forms, or other confirmed abuse patterns. The established registration history, broad traffic footprint, and clean external reputation materially support an apparently legitimate interpretation, while the real-world operator identity remains likely rather than independently verified.

EVIDENCE

- The homepage identifies the service as “WRadio: Noticias y Radio Online” and presents news, programs, podcasts, city coverage, and newsletter functionality.
- Domain registration: 2003-04-03; age 23.39 years; registrar Network Solutions, LLC.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and no confirmed phishing or blacklist hit; traffic rank was 40548.
- Browser testing recorded 4 suspicious inline scripts, 37 external XHR requests, 20 external POST requests, and 0 hidden forms, 0 password-external forms, 0 wallet-connect runs, and 0 cloaking detections.

Regulatory Verification Notes

The site appears to operate as an informational news and radio service rather than a financial or regulated transaction platform. Its homepage links to contact and privacy pages and displays a detailed cookie-consent notice describing advertising, analytics, geolocation, device-scanning, and profile-sharing purposes. No financial, broker, or other regulated-service license is claimed in the supplied site content; this is a disclosure point for ordinary regulatory verification, not evidence of impersonation or fraud. Registration privacy through Perfect Privacy, LLC is an administrative detail, and the available evidence remains consistent with an established site without proving the legal identity of its operator. The site's valid domain-validated TLS certificate and identified network infrastructure provide additional technical-integrity support.

EVIDENCE

- The homepage links to `/contacto` and `/politica-de-privacidad` and displays consent controls covering personalised advertising, audience measurement, geolocation, device information, and partner data processing.
- Confirmed network telemetry identifies AS20940, AKAMAI-ASN1 – Akamai International B.V., NL.
- TLS certificate: issuer YR2; validation level DV; valid to 2026-09-21T13:23:00+00:00.
- The third-party broker-reputation dataset returned no matching entity.

What to Verify Next

If credentials, subscriptions, or any payment interaction is contemplated, independently match the site's legal operator and contact details against the relevant corporate or media-sector registry, and review the applicable terms, privacy disclosures, cancellation or return provisions, and payment-protection arrangements. Official contact channels should be confirmed through an independent route before sensitive account or payment actions. The site's informational purpose makes ordinary browsing proportionate while those checks remain relevant for any higher-consequence interaction.

EVIDENCE

- The identity-verification status is likely rather than independently verified.
- The homepage provides contact and privacy pathways that can be compared with independently obtained operator information.
- The homepage contains no sensitive form and no login form, so any later credential or payment workflow should be assessed separately from the observed public content.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture. No scam, phishing, impersonation, or other contradictory signals were identified, although the available evidence does not independently prove the real-world operator identity.

Infrastructure Integrity

The site is protected by Fastly CDN/WAF infrastructure, with observed traffic terminating on CDN edge addresses and no origin candidate visible in the analysis. This reduces direct origin exposure and is a mitigating technical control, but it is not by itself proof of legitimacy. Confirmed routing also records an Akamai delivery layer, indicating that the observed network paths include more than one mainstream infrastructure provider.

EVIDENCE

- CDN/WAF provider: Fastly, Inc.; ASN AS54113; observed edge IPs 199.232.194.133 and 199.232.198.133.
- The infrastructure record contains 2 unique IP addresses, 2 CDN edge IPs, and 0 likely origin IPs.
- Confirmed technical telemetry separately identifies AS20940, Akamai International B.V., NL, as the server network.

Closing Assessment

Normal browsing and routine editorial use are proportionate; before submitting credentials or making payments, ordinary independent checks of merchant identity, return or cancellation terms, and payment protections should be completed.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	40%

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of wradio.com.co.

- The request stayed on wradio.com.co. It was not redirected to another domain. CLEAR
- Registration is published under NETWORK SOLUTIONS, LLC.. CLEAR
- DNS for this domain is served by nsone.net, across 4 name servers. NOTED
- The registration is paid up to 2027-04-09. NOTED
- It is hosted on AKAMAI-ASN1, from a server in NL. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about wradio.com.co at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
