

Is xn--strungsauskunft-9sb.de legit? TrustSniffer's high-trust assessment: 100/100

xn--strungsauskunft-9sb.de

Verdict

100

OUT OF 100

HIGH TRUST

xn--strungsauskunft-9sb.de appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-07-31 by automated analysis. Classification confidence 55%.

What this site appears to be

German-language informational page from Störungsauskunft.de showing current utility disruptions by service type, municipality, and postal code, with links to information, legal notice, privacy information, and language selection.

Key findings

- Automated classification: Not Scam.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is a German-language public-information service that presents a searchable map and directory of current electricity, gas, water, district-heating, and street-lighting disruptions by municipality and postal code, with no evident payment flow or commercial solicitation.

Scam/Impersonation Risk

No identity contradictions, phishing behavior, brand impersonation, or other fraud indicators were observed. The site's content and behavior consistently reflect its stated utility-status purpose, while its established traffic presence and clean external reputation support its legitimacy. No forms, credential collection, deceptive redirects, or suspicious transaction mechanisms were detected.

- The homepage presents location-specific disruption entries and operator-map functionality consistent with an informational utility-status directory.
- Homepage analysis found no login form, hidden form, sensitive-data request, cryptocurrency feature, or deceptive browser behavior.
- External threat-intelligence checks recorded zero malicious and zero suspicious detections, no known unsafe-browsing classification, and no reported hosting-address abuse.
- The domain is within the top one million globally ranked websites, at position 582,694.

Regulatory Verification Notes

The service does not present itself as a financial, investment, payment, or other regulated product, so licensing disclosures are not expected for the apparent business model. Links to an Impressum and privacy information provide appropriate legal and data-protection pathways for a German informational service. No adverse broker-reputation association was identified.

- The homepage provides visible links to the Impressum and Datenschutz pages, alongside German and English language selection.
- The observed service offers public outage information without an account, payment, investment, or paid-service mechanism.
- The site's transport encryption uses a DV certificate issued by YE2, valid until 2026-10-03.
- The third-party broker-intelligence dataset produced no matching broker profile.

What to Verify Next

Where outage information will inform safety-critical or operational decisions, the relevant network operator’s own notice should be used for confirmation. Institutional users should also review the Impressum and privacy information to establish the responsible legal contact and understand any data handling associated with searches or map use.

- The homepage describes the map as a “Karte der Betreiber,” indicating that operator-level confirmation is the appropriate corroborating source.
- Search results are organized by named municipality and postal code, enabling comparison with the applicable local operator’s service area.
- The visible legal-notice and privacy links provide the site-controlled sources for organizational and data-processing review.

Summary Verdict

This is a legitimate, established, and trustworthy informational website with a coherent purpose, stable behavior, meaningful public usage, and no contradictory risk signals. Normal interaction, including standard use and any ordinary account login the service may offer, is appropriate.

Infrastructure Integrity

The site is served from AS24940 by Hetzner Online GmbH in Germany and uses a CDN/WAF configuration in which the observed address is an edge server. This reduces direct exposure of the underlying service but is treated as a protective control rather than independent proof of legitimacy.

- The hosting infrastructure resolves to 168.119.145.186 on AS24940 (Hetzner Online GmbH, DE).
- The observed address was classified as a CDN/WAF edge endpoint, with one unique edge address identified.

Closing Assessment

Prospective users may engage with the service normally, while independently confirming any outage information before relying on it for safety-critical or operational action.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of xn--strungsauskunft-9sb.de.

- The request stayed on xn--strungsauskunft-9sb.de. It was not redirected to another domain. CLEAR
- DNS for this domain is served by netcup.net, across 3 name servers. NOTED
- It is hosted on HETZNER-AS, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about xn--strungsauskunft-9sb.de at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
