

Is xorgasmo.com legit? TrustSniffer's high-trust assessment: 90/100

xorgasmo.com

Verdict

90

OUT OF 100

HIGH TRUST

xorgasmo.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 75%.

What this site appears to be

XOrgasmo.com is an adult video aggregation site with many explicit listings, categories, channels, and social links. Registration appears available but currently disabled; login/password forms exist. Monetization appears to rely on ads/affiliate/referral links and external paid channels. The page lists extremely explicit material; some titles imply illegal/incestuous themes, raising additional safety concerns.

Evidence status and limitations

- Evidence completeness:

UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Full analysis

Overview

XOrgasmo.com is an adult video aggregation portal presenting explicit streaming clips, categories, channels, tags, social links, and account functions; its apparent business model is free content supported by advertising, referrals, and links to external paid channels.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, or conflicting-identity contradiction was observed. The homepage nevertheless presents a content-safety concern: several listings use titles implying incestuous, coercive, or potentially illegal themes, and the site includes a login and password-reset function despite registration appearing disabled. These issues affect content governance and account hygiene rather than establishing deceptive identity. The broader reputation evidence is clean, with no malicious or suspicious detections and no confirmed blacklist result.

EVIDENCE

- Homepage: the site identifies itself as an adult video and clips portal, with categories, channels, social links, and explicit listings.
- Homepage and account flow: login and password-reset forms are present, while registration appears unavailable.
- External reputation checks: no malicious or suspicious detections, abuse reports, or confirmed blacklist result was recorded.
- Domain registration: registered through Domain.com - Network Solutions, LLC in 2018 and currently expires on 2027-04-24.

Regulatory Verification Notes

The available evidence is consistent with an established, apparently legitimate entertainment website, but the real-world operator is not independently verified. The homepage does not clearly identify a corporate operator or explain payment handling, and it makes no licensing or registration claim; for this type of service, that is a transparency and verification gap rather than evidence of a scam. The use of private registration details is an administrative limitation, not an identity contradiction. The site's sustained web presence, established

registration, clean external reputation, and stable transport and hosting signals provide affirmative support for its established-site classification.

EVIDENCE

- Archive history: 220 snapshots spanning 2013–2026, with 14 years tracked.
- Hosting: served from AS16276 (OVH - OVH SAS, FR).
- Transport encryption: TLS certificate issued by YR1 at DV validation level, valid to 2026-09-30.
- Homepage: no clear corporate identity, licensing number, or transparent payment-handling disclosure is presented.

What to Verify Next

Before credential or payment interactions, independently confirm the operator's legal name and the authenticity of the site's official contact channels. Review the terms, privacy, age-verification, content-moderation, refund, and payment-protection provisions, and use a unique password if an account is created. Any paid transaction should be made only where the recipient, charge descriptor, cancellation terms, and available payment protections are clear.

EVIDENCE

- Homepage: legal, privacy, age-verification, and content-governance information should be located and reviewed.
- Account flow: password creation and recovery controls should be checked before account use.
- Any payment page: recipient identity, cancellation or refund terms, and payment-protection options should be confirmed before payment.

Summary Verdict

Available evidence supports a **high-trust, low-risk posture** for the website as an established online service, with no observed scam or impersonation contradictions. Legitimacy is apparent and evidence-consistent, while the operator's real-world identity remains likely rather than independently verified.

Infrastructure Integrity

Cloudflare CDN/WAF protection fronts the observed web infrastructure, and the origin server was not observable in this analysis. This provides a meaningful layer of exposure reduction and is a mitigating infrastructure signal, but it does not independently establish operator legitimacy.

Closing Assessment

Normal browsing is consistent with the assessment; independent merchant-identity, policy, and payment-protection checks should be completed before submitting credentials or making payments.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	38%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about xorgasmo.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
