Full analysis

Overview

The website xosodaiphat.com is a Vietnamese-language lottery-results and statistics service presenting real-time and historical draw information for XSMB, XSMN, XSMT, Vietlott, and Keno, together with frequency and search tools; its apparent business model is informational publishing supported by advertising and related promotions, with an optional Google-based login.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a consistent lottery-information identity, with no detected phishing, brand-impersonation, malicious-content, or blacklist indicators. The login function uses Google OAuth and is accompanied by links to terms of use and a privacy policy; the available analysis found no sensitive form or untrusted login destination. This supports a low scam or impersonation concern, although the available evidence does not independently verify the real-world operator behind the site.

EVIDENCE

- The homepage is classified as a lottery-results and information page and contains no reported red-flag items.
- The domain was registered in 2014 and is approximately 11.77 years old.
- The web archive records 208 snapshots from 2016 through 2026, covering 11 tracked years.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and no blacklist hit for the domain.

Regulatory Verification Notes

The footer reportedly provides contact and company information, which is a positive transparency feature for an informational publisher. However, no licensing authority or license number is claimed in the available site analysis, and the legal identity has not been independently connected to a verified real-world operator. That is a verification gap rather than evidence of fraud. The site's lottery-results and advertising model should also be distinguished from operating a lottery, accepting wagers, or providing regulated financial services; any such activities would require separate regulatory confirmation.

EVIDENCE

- The footer contains contact and company information.
- The domain registrar is P.A. Viet Nam Company Limited; the recorded creation date is 2014-11-07 and the expiration date is 2030-11-07.
- The site uses a valid DV TLS certificate issued by WE1, valid through 2026-11-05.
- Hosting resolves through AS13335, CLOUDFLARENET - Cloudflare, Inc., US.

What to Verify Next

Before credential or payment-related interaction, an independent check should confirm that the company details in the footer correspond to the intended operator and that any applicable local requirements for lottery-related publishing, advertising, promotions, or affiliate activity are satisfied. The terms, privacy policy, and Google OAuth flow should be reviewed to ensure that the account activity requested is limited to the stated service. Any advertised promotion or external commercial offer should be assessed separately using ordinary merchant-identity, return-policy, and payment-protection checks.

EVIDENCE

- The homepage links the Google login flow to the site's terms of use and privacy policy.
- The footer supplies the contact and company details to be checked through an independent source.
- The published business model is informational and advertising-supported, with no license claim identified in the available analysis.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate, low-risk website rather than a scam or impersonation operation. The high-trust posture is supported by convergent historical continuity, clean external reputation, coherent page content, and sound transport and hosting controls, while operator identity remains independently unverified.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure. All four observed addresses are CDN edge addresses associated with AS13335, and no origin candidate was identified in the analysis; this reduces direct origin exposure and is a mitigating infrastructure signal, not proof of the operator's legitimacy.

Closing Assessment

Normal informational browsing is proportionate to the observed posture; account login or any payment-linked interaction should proceed only after the ordinary independent identity, policy, and payment-protection checks described above.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about xosodaiphat.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
