

Is yakult-hk.com a scam? TrustSniffer's high-risk assessment: 5/100

yakult-hk.com

Verdict

5

OUT OF 100

CRITICAL RISK

yakult-hk.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-09-22 by automated analysis. Classification confidence 75%.

What this site appears to be

Ecommerce product page (print-on-demand design) titled 'SUNMORY33: Slot Gacor Malam Ini Paling Dicari Pemain Online'. Contains product description, pricing, account/login and newsletter subscription flows. Mentions gambling-related keywords but functions as a merchandise listing.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What yakult-hk.com served when TrustSniffer captured it on 2026-09-22. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2017.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website is an ecommerce storefront presenting a print-on-demand merchandise listing titled “SUNMORY33: Slot Gacor Malam Ini Paling Dicari Pemain Online.” Its apparent model is apparel and merchandise sales through account creation, cart, checkout, and newsletter flows, although the product copy is heavily centered on online slot-gambling terminology.

Scam/Impersonation Risk

The site presents a **critical sensitive-interaction risk** because external security intelligence recorded malicious detections and confirmed blacklist status from multiple sources. This is materially more significant than the storefront presentation itself: the available page analysis found no explicit investment, custodial-finance, or credential-harvesting mechanism, but the external detections create a direct contradiction to treating the site as safe for login, credential submission, or payment activity. The published product content also combines a merchandise listing with repeated gambling-oriented language, including references to “slot gacor,” spin patterns, scatter features, and payment patterns; although the page states that outcomes are random and does

not guarantee winnings, this unusual content-to-business-model mismatch warrants additional scrutiny. No conflicting legal-entity names or confirmed brand-impersonation finding were supplied.

EVIDENCE

- The storefront homepage is titled “SUNMORY33: Slot Gacor Malam Ini Paling Dicari Pemain Online” and contains account/login, newsletter, and checkout forms.
- External reputation assessment recorded 13 malicious detections and 1 suspicious detection from 19 evaluated results, with Fortinet and Sophos among the flagged vendors.
- The domain was marked as blacklisted by two external sources; a separate Google Safe Browsing result was not malicious.
- Historical records show 417 archive snapshots spanning 2017–2026, covering 10 tracked years; this continuity does not offset the current malicious-detection and blacklist findings.

Regulatory Verification Notes

The site’s apparent activity is ordinary ecommerce rather than a disclosed financial or investment service, but the available content does not identify a licensing authority or license number. The operator’s real-world identity remains unverified, so the storefront’s presentation should not be treated as proof of an established merchant or authorized gambling-related business. The domain record lists Name.com, Inc. as registrar and records creation on 2026-07-23, while the historical record independently shows substantial prior web activity; that discrepancy should be resolved through independent domain and merchant-identity checks rather than interpreted as proof of either legitimacy or misconduct. Transport security is present, but domain-validated encryption authenticates the connection, not the operator.

EVIDENCE

- The available product-page content identifies a print-on-demand ecommerce model and contains no claimed license authority or license number.
- WHOIS records list Name.com, Inc. as registrar, creation date 2026-07-23, and an age of approximately 0.17 years; the recorded owner is “Redacted For Privacy.”
- The site is hosted on AS396982, Google Cloud Platform / Google LLC, United States.
- The TLS certificate is issued by YR1 using domain validation and is valid until 2026-10-25.

What to Verify Next

Before any account, purchase, or payment interaction, an independent party should confirm the merchant’s legal name, physical business details, refund terms, and payment-recipient identity through records obtained outside the website. Any claimed authorization relevant to gambling-related content should be checked directly with the competent licensing registry, using the legal entity rather than the site title. Contact channels and checkout destinations should also be validated through an independent route, and payment methods with dispute or chargeback protection should be preferred if engagement is ultimately approved.

EVIDENCE

- The homepage exposes account creation/login and checkout flows, making merchant identity and payment-recipient verification directly relevant.
- The product page combines merchandise sales with gambling-related promotional text, requiring clarification of the actual commercial purpose.
- The site's available content does not provide a license authority or license number to validate independently.

Summary Verdict

The overall posture is critical and unsuitable for normal sensitive interaction. The available evidence does not establish a trustworthy connection between the storefront and a verified real-world operator, while the confirmed external reputation contradictions require a security-forward treatment.

Infrastructure Integrity

The site resolves directly to one apparent origin address rather than through a detected CDN edge, so there is no identified edge-layer separation to mitigate exposure. The hosting infrastructure is Google Cloud Platform, operated by Google LLC in the United States, on AS396982; this is a hosting fact and does not establish legitimacy.

EVIDENCE

- Hosting provider: Google Cloud Platform — Google LLC, United States.
- Autonomous system: AS396982.
- Resolved address count: 1 unique IP, with 0 detected edge IPs and 1 likely origin IP.
- No CDN was detected.

Closing Assessment

Prospective users should suspend account creation, credential submission, and payment activity until the operator, business purpose, and relevant authorization have been independently confirmed.

Written analysis generated 2026-09-22 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat

- Most of what the page loaded came from other domains rather than from this one.

Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH

- The structure of the page changed sharply while it was loading.

Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE

- The page replaced a large part of its own content after loading.

Behaviour in a sandbox rule:BEHAV_DOM_CHANGE_HIGH

- The page rewrote itself after it was interacted with, so what a visitor first sees is not what they end up on.

Behaviour in a sandbox rule:BEHAV_DOM_DIFF_AFTER_INTERACTION

- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
--------	------------

Identity score	30/100
----------------	--------

Identity verification confidence	25%
----------------------------------	-----

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of yakult-hk.com.

- The request stayed on yakult-hk.com. It was not redirected to another domain. [CLEAR](#)
- Registration is published under Name.com, Inc.. [CLEAR](#)
- DNS for this domain is served by name.com, across 4 name servers. [NOTED](#)
- The registration is paid up to 2027-07-23. [NOTED](#)
- The earliest public archive of this site is from 2017-09-05. [CLEAR](#)
- It is hosted on GOOGLE-CLOUD-PLATFORM, from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about yakult-hk.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
