Full analysis

Overview

This website is a Japanese online manga and entertainment portal branded as ヤンチャンWeb (Young Champion), presenting serialized manga, rankings, gravure content, campaigns, free-reading promotions, and account-based access to selected episodes. Its apparent business model is publisher-led digital content distribution supported by registrations, gated access, promotions, and related volume sales or advertising.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, or other contradictory signals were observed. The homepage has login and registration functions, but the supplied behavioral evidence found no hidden forms, external password submissions, wallet activity, clipboard manipulation, cloaking, or suspicious scripts. The site presents a coherent editorial catalogue and attributes copyright to Akita Publishing; that attribution supports the apparent publishing model but does not independently prove the real-world operator identity.

EVIDENCE

- The homepage identifies the service as ヤンチャンWeb / Young Champion and displays manga serializations, rankings, campaigns, and account-access functions.
- Behavioral testing recorded two successful runs with no hidden forms, zero external password forms, zero wallet-provider detections, and no cloaking classification.
- The domain was registered on 2001-03-26 and is approximately 25.39 years old.
- Archive records contain 231 snapshots from 2023-03-28 through 2026-07-27, covering 4 years.

Regulatory Verification Notes

The available evidence is consistent with an established media website rather than a regulated financial or investment service. The site content attributes copyright to Akita Publishing, but the real-world operator identity remains independently unverified. No financial license, registration number, or regulated-service claim is presented in the supplied material; for this type of publishing portal, that is a disclosure and verification consideration rather than evidence of a scam. A separate broker-reputation dataset produced no match, which is contextual only and not a legal or licensing determination.

EVIDENCE

- The homepage is classified as a content and online-magazine page whose stated activities are manga publication, entertainment content, rankings, and promotions.
- The homepage attributes copyright to Akita Publishing.
- The site is served from AS16509, Amazon.com, Inc. (AMAZON-02), US.
- The transport certificate is issued by Amazon RSA 2048 M04, uses Domain Validation (DV), and is valid to 2027-01-08T23:59:59+00:00.

What to Verify Next

Before credential or payment interactions, an enterprise or consumer user should independently confirm the publisher relationship through an official Akita Publishing channel, review the site's terms, privacy, account-recovery, and payment provisions, and confirm any applicable purchase, cancellation, or refund arrangements. Support and contact channels should be validated through an independent route rather than relying solely on information presented within the site.

EVIDENCE

- The homepage provides login and free-registration paths, with some episodes available only through account access.
- The homepage displays campaign notices, free-content offers, rankings, and publisher-related content rather than financial or investment services.
- The available identity-verification status does not independently connect the website to a confirmed real-world operator.

Summary Verdict

The website has a **high-trust, low-risk posture** and the evidence is consistent with an established, apparently legitimate online publishing service. No contradictory indicators were identified, although the operator's real-world identity is not independently verified.

Infrastructure Integrity

The website is protected by AWS CloudFront CDN/WAF infrastructure, with observed addresses resolving to Amazon edge servers rather than a directly exposed origin. This provides a meaningful defensive layer against common infrastructure abuse and origin exposure, while remaining a mitigating technical control rather than proof of legitimacy.

Closing Assessment

Normal browsing is proportionate to the assessed posture; credential or payment use should follow ordinary independent checks of the publisher relationship, account terms, and payment protections.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about youngchampion.jp at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
