

Is yourloan24.co.za safe? TrustSniffer's moderate-trust assessment: 50/100

yourloan24.co.za

Verdict

yourloan24.co.za is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Sensitive Interaction Risk

Assessed 2026-07-31 by automated analysis. Classification confidence 70%.

What this site appears to be

South African loan-comparison page advertising loans up to R350,000 and collecting detailed applicant data including an SA ID number, address, employment status, and monthly income. It provides representative loan costs and says it is not a credit provider, but the supplied content does not establish a verifiable legal operator, registration, physical address, or direct contact channel before sensitive data submission.

Evidence status and limitations

Evidence completeness: **UNKNOWN**

- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2024.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website operates as a South African loan-comparison and lead-generation service, presenting loan offers of up to R350,000 and gathering applicant information for referral to partner lenders, including Myloan.co.za.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing behavior, or active threat indicators were observed. The domain's documented history is consistent with its current purpose, with no evidence of suspicious repurposing or material semantic drift. Its presence within a recognized global traffic index and clean external reputation provide moderate legitimacy support, although neither establishes the operator's regulatory standing.

- The homepage showed no login form, hidden forms, cloaking, or browser-behavior anomalies.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no search-browser security hit, and no reported infrastructure abuse.
- The domain was registered in 2024 and is approximately 2.12 years old; registration is held through Ports Group for Karman Connect A/S.
- Web archives contain 47 snapshots spanning 2024–2026, representing 3 years of tracked history without detected repurposing.

Regulatory Verification Notes

The homepage states that YourLoan24 is a comparison tool rather than a credit provider and claims to work only with South African National Credit Regulator-registered providers. It also presents representative borrowing costs, which assists consumer understanding. However, the supplied page content does not establish a verifiable legal operator, corporate registration, physical address, direct contact channel, or regulatory identifier supporting those claims. This is a material disclosure gap because the application requests a South African ID number, residential address, employment status, after-tax monthly income, debt-review status, telephone number, and email address before referral; it should not be treated as evidence of fraud in the absence of contradictory signals.

- The homepage advertises flexible repayment and same-day approvals for loans up to R350,000 while describing the service as free to consumers.

- The application form is a sensitive financial-data collection form covering identity, contact, address, employment, income, and indebtedness information.
- The domain registration identifies Karman Connect A/S as the registrant organization and Ports Group as registrar, with registration expiring on 18 June 2027.
- The site is served from AS16509 (AMAZON-02 — Amazon.com, Inc., US); its transport encryption uses a YR1-issued DV certificate valid until 28 October 2026.

What to Verify Next

Before submitting an application or relying on a proposed lender, the operating entity should be matched to an official corporate record, and each receiving credit provider should be confirmed directly in the National Credit Regulator’s register. The privacy terms should be examined for the legal data controller, retention period, referral recipients, consent-withdrawal process, and procedures for access or deletion. Official support and contact channels should also be confirmed independently before transmitting identity or financial information.

- The application workflow states that submitted information is processed for comparison and referral to cooperating lenders.
- The consent language permits loan-market updates and recommendations by email and SMS, with withdrawal referenced through the privacy policy.
- The supplied site content names Myloan.co.za as an application-processing partner but does not document the complete recipient chain.
- No third-party broker profile was matched to the service, so that dataset provides no additional reputational corroboration.

Summary Verdict

The site presents a moderate, presently unconfirmed trust posture rather than evidence of an active scam. Consistent provenance, clean threat intelligence, and a technically valid service environment support ordinary browsing, while the high-sensitivity application process prevents a stronger institutional assurance conclusion.

Infrastructure Integrity

Cloudflare CDN/WAF protection is present, and the single observed address was an edge endpoint rather than an independently observable origin server. This reduces direct origin exposure and provides a mainstream protective layer, but it is only a technical mitigation and does not authenticate the business behind the service.

Closing Assessment

Routine browsing is reasonable, but sensitive-data submission and consequential financial engagement should follow successful independent verification of the relevant parties and data-handling terms.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100

Identity verification confidence	50%
----------------------------------	-----

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of yourloan24.co.za.

- The request stayed on yourloan24.co.za. It was not redirected to another domain. CLEAR
- Registration is published under Ports Group. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-06-18. NOTED
- The earliest public archive of this site is from 2024-07-09. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about yourloan24.co.za at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
