Key findings

- Automated classification: Not Scam.
- Public web-archive history exists since 2001.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is an established, advertising-supported Australian media portal that provides regional television schedules, channel and program information, news navigation, and pathways to selected content on Nine's 9Now streaming service.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing behavior, or malicious reputation signals were observed. The site's long operating history, consistent informational purpose, clean external reputation, and absence of credential-capture mechanisms collectively support its legitimacy.

- The Sydney TV Guide page presents extensive television listings, regional preferences, and Nine-branded entertainment content without fraud-related claims or deceptive prompts.
- The domain's provenance dates to 2001 (~25.26 years old), with 1,697 archive snapshots spanning 2001–2015 (15 years tracked) and no detected suspicious repurposing.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no unsafe-browsing finding, and no external blacklist finding.
- The assessed page contained no login form, hidden form, sensitive-data form, untrusted form destination, or suspected brand impersonation.

Regulatory Verification Notes

The observed service is informational and entertainment-focused rather than a regulated financial, investment, or brokerage offering; consequently, financial licensing is not implicated by the presented business model. Domain registration identifies Nine Digital Pty Limited through Corporation Service Company (Aust) Pty Ltd, providing coherent corporate attribution. The registration and technical identity evidence contains no conflicting legal-entity names.

- Domain registration records name NINE DIGITAL PTY LIMITED as the owner and Corporation Service Company (Aust) Pty Ltd as registrar.
- The TV Guide page describes an entertainment and schedule-navigation service, with no financial product, investment solicitation, or licensing claim.
- The site is served from AS16509 (AMAZON-02 — Amazon.com, Inc., US).
- The site's transport encryption uses a valid DV TLS certificate issued by YR1, valid to 2026-09-09.

What to Verify Next

Routine due diligence for a material advertising, data-sharing, or commercial relationship should confirm the contracting entity and authorized representatives through independently sourced Nine corporate channels.

Ordinary visitors may use the television guide and associated account functionality normally, while ensuring that any transition to an affiliated service retains the expected Nine branding and destination.

- The TV Guide page allows visitors to select Australian states and regional markets, including Sydney and other NSW locations.
- Program listings provide pathways to selected content available through the affiliated 9Now service.
- The assessed page is a content-rich informational interface and does not itself request passwords, payment details, or wallet access.

Summary Verdict

The site is legitimate, established, and trustworthy. Its identity, historical continuity, page content, external reputation, and technical controls converge without contradictory risk indicators, supporting normal use with high confidence.

Infrastructure Integrity

The site operates behind CDN/WAF protection using four observed edge addresses, with no origin-server candidate exposed during the assessment. This reduces direct infrastructure exposure and is a useful security control, although it is supporting protection rather than independent proof of legitimacy.

Closing Assessment

Normal browsing, account login, and standard use are appropriate; enhanced organizational due diligence is warranted only when entering a consequential commercial or data-sharing arrangement.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of yourtv.com.au.

- The request stayed on yourtv.com.au. It was not redirected to another domain. CLEAR
- Registration is published under Corporation Service Company (Aust) Pty Ltd. CLEAR
- DNS for this domain is served by awsdns-03.org, across 4 name servers. NOTED
- The earliest public archive of this site is from 2001-04-28. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about yourtv.com.au at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
