## Full analysis

---

### Overview

This is a Chinese-language live-streaming and sports-content portal presenting live broadcasts, sports commentary, user accounts, reservations, follows, virtual gifting, and mobile-app access; its apparent business model is audience engagement supported by advertising and in-platform virtual currency activity.

### Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent social live-streaming service rather than a deceptive financial or credential-harvesting scheme, and the available checks found no malicious, phishing, or impersonation indicators. Login and registration forms are present, but their presence is consistent with the stated account-based service. The virtual-coin and gifting model creates ordinary consumer-payment considerations, not evidence of impersonation.

#### EVIDENCE

- The homepage identifies live streaming, sports broadcasts, reservations, follows, virtual coins, and gifting, with no listed fraud indicators.
- External reputation checks recorded 0 malicious and 0 suspicious detections, with no confirmed threat finding.
- The domain was registered in 2020 and is approximately 6.2 years old.
- Web archives contain 19 snapshots spanning 2021–2025, covering 5 tracked years.

### Regulatory Verification Notes

The site content does not establish a licensing authority, registration number, or sufficiently detailed operator disclosure for independent regulatory verification. This is a transparency matter concerning the platform's virtual-currency and gifting model, not an identity contradiction or evidence of fraud. The domain is registered through Web Commerce Communications Limited, while the site presents a valid transport certificate and a stable, established operating footprint. No relevant third-party broker match was identified.

#### EVIDENCE

- The domain registrar is Web Commerce Communications Limited; expiration is recorded as 2027-05-22.
- The site is served through AS53667, PONYNET - FranTech Solutions, US.
- TLS is issued by YR1 at DV validation level and is valid through 2026-09-14.
- The homepage provides login, registration, and mobile-app promotion but does not display a licensing number or regulatory authority.

What to Verify Next

Before any material purchase of virtual currency or gifting balance, the operator should confirm applicable refund, withdrawal, age, and consumer-protection terms through the site’s legal materials. The official mobile application should be obtained only through a distribution channel independently associated with the platform, and any regulatory requirement applicable to paid streaming or virtual-currency services should be checked with the relevant authority.

EVIDENCE

- The homepage exposes account registration and login functions.
- The homepage promotes a mobile application.
- The platform displays virtual coins and gifting functionality.
- The supplied content does not provide enough information to independently verify ownership, licensing, or monetization terms.

Summary Verdict

The website presents as a legitimate, established, and trustworthy consumer streaming platform with no observed scam or impersonation contradiction. Its overall posture supports normal interaction, including account login and standard use, while regulatory and operator disclosures remain matters for routine due diligence.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, and observed addresses are CDN edge servers rather than exposed origin candidates. This reduces direct origin exposure and is a meaningful mitigating control, although protective infrastructure alone does not establish legitimacy.

Closing Assessment

Normal account use is appropriate; material financial activity should remain consistent with the platform’s published terms and applicable consumer safeguards.

## About this assessment

A trust score summarises the evidence TrustSniffer could collect about yuyantv.cn at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
