

Is zaaztelecom.com.br legit? TrustSniffer's high-trust assessment: 100/100

zaaztelecom.com.br

Verdict

100

OUT OF 100

HIGH TRUST

zaaztelecom.com.br appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 70%.

What this site appears to be

Portuguese-language commercial website for Zaaz ISP offering fiber internet and mobile plans, with pricing, benefit descriptions, FAQ, contact phone, and company registration (CNPJ). Primary purpose is selling recurring subscription services; no clear phishing or high-risk investment behavior detected.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This is a Portuguese-language commercial website for Zaaz, presenting consumer and enterprise fiber-internet services, mobile plans, bundled benefits, pricing, FAQs, customer support, and subscription sign-up options. Its apparent business model is the sale of recurring telecommunications services, supported through telephone and WhatsApp channels.

Scam/Impersonation Risk

No contradictions were observed. The website's content is consistent with a conventional telecommunications provider rather than a phishing, investment, cryptocurrency, or other high-risk-abuse operation. The homepage contains substantive service descriptions, plan information, support routes, and company-registration information; technical behavior also showed no login form, hidden sensitive form, credential-harvesting behavior, wallet activity, cloaking, or suspected brand impersonation. External reputation checks were clean, with no malicious or suspicious detections and no identified broker-dataset match. The available evidence therefore supports an apparently legitimate, low-risk site, while not independently proving the real-world operator's identity.

EVIDENCE

- The homepage presents Zaaz fiber and mobile services, recurring monthly plans, customer support, FAQs, and a CNPJ reference.
- The site's behavioral execution completed 2 successful runs, with 0 hidden forms, 0 password-external forms, 0 wallet-connect runs, 0 wallet-drainer runs, and 0 cloaking detections.
- Domain registration evidence: registered 2020-05-28; age 6.21 years; expiration 2031-05-28.
- Archive history: 103 snapshots spanning 2021-09-30 to 2026-08-02, covering 6 years.

Regulatory Verification Notes

The legal and commercial presentation is materially stronger than that of an anonymous subscription page: the site identifies the Zaaz business name, provides a CNPJ reference, publishes pricing and service descriptions, and supplies customer-contact routes. However, the available pages do not clearly present a verifiable licensing number or regulatory authorization, so regulatory status should be treated as a verification item rather than assumed. This is a disclosure gap, not evidence of fraud. The site's apparent legitimacy is supported by its sustained domain and page history, clean external reputation, and valid transport security, but the operator's independent real-world identity remains unverified.

EVIDENCE

- The homepage and contact-oriented content provide a CNPJ reference, telephone support, WhatsApp contact, plan pricing, and customer-service information.
- The site's TLS certificate is issued by Sectigo Public Server Authentication CA DV R36, uses DV validation, and is valid to 2026-11-28.
- The domain's hosting is associated with AS270814, identified as ZAAZ PROVEDOR DE INTERNET E TELECOMUNICACOES LTDA, Brazil.

What to Verify Next

Before credential or payment interactions, an independent check should match the published CNPJ and trading name against the applicable Brazilian corporate and telecommunications records. The subscription terms should be reviewed for installation obligations, cancellation rights, recurring-billing conditions, service-level commitments, and applicable consumer protections. Contact channels should also be confirmed through an independently sourced ZaaZ customer-service route, and any payment should use a method providing suitable dispute and chargeback protection.

EVIDENCE

- The commercial flow is based on recurring service subscriptions rather than one-time informational access.
- The site provides plan pricing, customer support routes, FAQs, and a CNPJ reference that can be compared with independent records.
- The available regulatory context does not identify a verified licensing or authorization record.

Summary Verdict

The overall posture is **high trust and low risk**, and the available evidence is consistent with an established, apparently legitimate website. No scam, phishing, impersonation, or other contradictory signal was identified, although the connection between the website and a verified real-world operator remains unconfirmed.

Infrastructure Integrity

The site resolves directly to infrastructure associated with AS270814, ZAAZ PROVEDOR DE INTERNET E TELECOMUNICACOES LTDA, in Brazil. No CDN or WAF was identified, and the resolution includes two likely origin addresses rather than a separate edge-IP layer; this is an infrastructure characteristic, not an adverse legitimacy finding.

EVIDENCE

- Hosted on AS270814, ZAAZ PROVEDOR DE INTERNET E TELECOMUNICACOES LTDA, BR; observed IP 187.121.160.17.
- Registry and hosting country: LACNIC / BR.
- No CDN detected; 0 edge IPs and 2 likely origin IPs identified.

Closing Assessment

Normal browsing and ordinary service evaluation are proportionate to the assessment; independent merchant-identity, subscription-term, and payment-protection checks should be completed before submitting credentials or making a payment.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of zaaztelecom.com.br.

- The request stayed on zaaztelecom.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by 216.10, across 3 name servers. NOTED
- The registration is paid up to 2031-05-28. CLEAR
- The earliest public archive of this site is from 2021-09-30. CLEAR
- It is hosted on AS270814, from a server in BR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about zaaztelecom.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
