Full analysis

Overview

Zenith Bank Ghana's website is an established corporate banking portal presenting personal, SME, and corporate financial services, digital banking, cards, payments, loans, foreign exchange, investment products, branch services, security information, and corporate resources for customers and businesses.

Scam/Impersonation Risk

No contradictions were observed across the supplied evidence: there were no phishing, impersonation, blacklist, malicious-content, or identity-conflict findings. The homepage presents a coherent banking model spanning accounts, loans, cards, payments, foreign exchange, investment products, and digital banking, without deceptive financial-promotion signals or credential-harvesting behavior. The site's long operational continuity and consistent institutional presentation further support an established identity.

- The domain was registered on 2006-09-26 and is 19.86 years old.
- The site has 322 archive snapshots spanning 2007-03-19 to 2026-08-01, covering 20 years.
- The homepage presents Zenith Bank Ghana branding, banking products, branch services, security information, and corporate resources; no phishing indicators were identified.

Regulatory Verification Notes

The site presents a clear Zenith Bank Ghana identity and provides legal, privacy, security, branch, and regulatory information. However, the supplied page evidence does not identify a license number or independently verify licensing status; this is a transparency item for formal due diligence, not evidence of deception. The available third-party broker context produced no match.

- The site's transport encryption uses an OV certificate issued by DigiCert Global G2 TLS RSA SHA256 2020 CA1 for Zenith Bank Ghana Limited, valid to 2026-09-18.
- The domain registration identifies Ghana Dot Com as registrar and ZENITH BANK (GHANA) LTD as the organization.
- The site is hosted on AS19551, INCAPSULA - Incapsula Inc, US.

What to Verify Next

For institutional onboarding or material financial activity, confirm the bank's licensing and supervisory status through the relevant official Ghanaian registry, and validate published contact and branch details through an independently sourced institutional channel. Review the applicable legal, privacy, security, and product terms before entering into a specialized banking arrangement.

- The homepage links its banking, security, regulatory, branch, and corporate information through the site’s primary navigation.
- The site presents separate personal, SME, and corporate service areas suitable for product-specific due diligence.

Summary Verdict

The website has a high-trust, established posture supported by converging identity, continuity, content-quality, reputation, and security evidence. No scam, impersonation, phishing, or identity contradiction was identified, and normal interaction is appropriate.

Infrastructure Integrity

The site is served through Incapsula’s content-delivery infrastructure, which provides a meaningful exposure-mitigation signal for the public-facing service. This infrastructure supports, but does not independently establish, the site’s legitimacy.

Closing Assessment

Normal browsing, account login, and standard account use are appropriate, with ordinary institutional controls retained for significant transactions or onboarding decisions.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about zenithbank.com.gh at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
