Full analysis

Overview

The website is a Turkish-language corporate banking portal presented as T.C. Ziraat Bankası A.Ş., offering individual and corporate banking services including deposits, loans, payments, investment products, digital banking, market information, branch and ATM locating, and customer-service resources.

Scam/Impersonation Risk

No contradictions were observed. The homepage has the structure and content of an established banking institution, with coherent navigation for retail and corporate customers, banking calculators, market information, branch and ATM services, announcements, and links to five mainstream social platforms. The reviewed content contains no phishing indicators, malicious behavior, suspicious forms, or brand-impersonation signals. Available evidence is therefore consistent with an established, apparently legitimate website, although the real-world operator identity is not independently verified. Evidence:

- The homepage identifies the organization as “T.C. Ziraat Bankası A.Ş.” and presents banking, investment, digital-banking, and customer-service navigation.
- Behavioral inspection recorded no external network activity, hidden forms, wallet activity, clipboard manipulation, cloaking, or suspicious inline scripts.
- External reputation telemetry recorded 0 malicious and 0 suspicious detections, with 0 abuse reports.
- The domain was registered in 1997 and is approximately 29.19 years old.

Regulatory Verification Notes

The reviewed pages provide substantial banking and institutional content, but no explicit license or registration number was identified in the available page material. This is a disclosure and verification point rather than evidence of scam activity. A third-party broker dataset associates the exact domain with “Ziraat Finans Group” and records a “No Regulation” status; that signal is reputational context only, is not a legal or regulatory determination, and does not establish an identity conflict with the banking website. The site's long-established registration, organization-validated transport security, stable technical operation, and clean external reputation support an evidence-consistent legitimacy assessment, while the available material does not independently prove the operator's real-world identity. Evidence:

- The homepage and institutional navigation identify the site as T.C. Ziraat Bankası A.Ş.; no license or registration number is stated in the reviewed material.

- The domain registration record shows creation on 1997-06-11 and expiration on 2029-06-10.
- The site is hosted on AS31471, FINTEK-AS - Ziraat Teknoloji AS., TR.
- TLS uses GeoTrust TLS RSA CA G1 with OV validation, subject organization T.C. Ziraat Bankası A.Ş., valid through 2026-10-10.

What to Verify Next

Before credential or payment interactions, an independent source should be used to confirm the relevant bank identity and official contact channels, such as a separately obtained branch or institutional contact route. Applicable banking authorization should be checked against the relevant Turkish regulatory or institutional registry, and ordinary payment-protection and transaction-dispute procedures should be confirmed before any financial action. Evidence:

- The site exposes “Bank/About” and “Investor Relations” navigation that can be compared with independently sourced institutional information.
- The available page material contains digital-banking and customer-service pathways, making independent confirmation of the correct access route appropriate before sensitive use.
- The regulatory disclosure material available for review does not provide a license or registration number for direct registry comparison.

Summary Verdict

The overall posture is **high trust and low risk**. Available evidence is consistent with an established, apparently legitimate banking website, with no observed scam, phishing, impersonation, or malicious-content indicators; operator identity remains likely but not independently verified.

Infrastructure Integrity

The site resolves directly to infrastructure operated by FINTEK-AS - Ziraat Teknoloji AS. in Türkiye, without a detected CDN or WAF layer and with a likely origin address visible. This infrastructure is a mitigating technical signal because the hosting organization aligns with the presented institutional context, but infrastructure alignment alone is not proof of legitimacy.

Closing Assessment

Routine informational use is proportionate; credentials or payments should be preceded by ordinary independent confirmation of the institution, official access channel, and applicable payment protections.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Trusted social count=5

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of ziraatbank.com.tr.

- The request stayed on ziraatbank.com.tr. It was not redirected to another domain. CLEAR
- DNS for this domain is served by 207.1. NOTED
- The registration is paid up to 2029-06-10. CLEAR
- It is hosted on FINTEK-AS, from a server in TR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about ziraatbank.com.tr at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
