

Is znakomstva.ru legit? TrustSniffer's high-trust assessment: 100/100

znakomstva.ru

Verdict

100

OUT OF 100

HIGH TRUST

znakomstva.ru appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-03 by automated analysis. Classification confidence 75%.

What this site appears to be

Russian-language Love.ru dating-platform landing page promoting free registration, nearby matches, mobile-app access, active user profiles, testimonials, privacy terms, and customer support.

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2000.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website operates a Russian-language online dating and social-discovery service, presenting free profile registration, location-based matching, active member profiles, testimonials, account access, and a mobile application intended to facilitate personal relationships and social connections.

Scam/Impersonation Risk

No identity contradictions, phishing characteristics, brand impersonation, malicious reputation findings, or known abuse patterns were observed. The homepage consistently presents a dating service and claims that 7,677,545 people use the platform; while that promotional figure is not independently substantiated by the supplied evidence, it appears within a coherent, mature service offering rather than a deceptive investment or payment proposition. The long-established domain, extensive historical record, substantial traffic footprint, and clean external reputation strongly support the conclusion that this is the authentic, established service.

- The domain-registration record shows registration in 1999 and an age of approximately 26.77 years.
- The web archive contains 1,053 snapshots spanning 2000–2026, representing 27 years of tracked history, with no detected suspicious repurposing or semantic drift.
- The homepage consistently identifies the service as Love.ru/Znakomstva.ru and offers profile registration and account login for dating purposes.
- External reputation telemetry records 0 malicious and 0 suspicious detections, no search-safety finding, no abuse reports, and a global traffic rank of 55,884.

Regulatory Verification Notes

The service is presented as a general dating and social platform rather than a regulated financial, brokerage, or investment business, so no sector-specific financial licence is indicated by its stated activities. The homepage places acceptance of the privacy policy and terms of use directly within the registration flow, which is appropriate for a platform processing personal profiles and relationship-related information. The supplied page capture establishes that these documents are referenced, but does not provide their substantive legal-entity, data-retention, or dispute-resolution provisions for assessment.

- The homepage requires prospective registrants to agree to the privacy policy and terms of use when creating a profile.
- The homepage characterizes registration as free and presents the service as a dating and social-discovery platform, without financial or investment products.
- The confirmed hosting endpoint is 188.120.235.177 in Russia, served from AS29182 by RU-JSCIOT – JSC IOT, RU.

- The site uses a valid domain-validated TLS certificate issued by YE2, valid until 2026-09-08; the domain registration expires on 2026-11-30 and the registrar is REGRU-RU.

What to Verify Next

Institutional due diligence should review the privacy policy and terms for the contracting entity, applicable jurisdiction, personal-data retention, profile deletion, complaint handling, and recurring-payment provisions, if any. The official mobile application should be obtained only through the platform’s identified store listing, with the publisher identity matched to the service. Prospective users should also confirm the platform’s moderation, account-recovery, blocking, and reporting controls, given the inherent interpersonal and privacy risks of user-generated dating services.

- The homepage provides a QR-code route for downloading the mobile application.
- The landing page displays active user profiles containing names, ages, and locations, demonstrating the platform’s handling of personal profile information.
- The homepage presents user testimonials and directs visitors toward registration and interaction with other members.
- Customer-support availability is represented in the supplied page description, making support and account-recovery procedures appropriate subjects for operational review.

Summary Verdict

The site is a legitimate, established, and trustworthy online dating platform. Its identity, historical continuity, public usage footprint, page content, and external reputation converge without evidence of fraud, impersonation, phishing, or malicious operation. Normal interaction, including registration, account login, and standard platform use, is appropriate.

Infrastructure Integrity

The service is hosted directly on JSC IOT infrastructure rather than behind an identified CDN or WAF; two resolved addresses are assessed as likely origin systems. This conventional direct-hosting posture does not constitute an adverse trust signal, although it provides less edge-layer shielding than a mainstream protective network.

Closing Assessment

Prospective users may use the service normally, while applying ordinary online-dating precautions concerning personal disclosure, interpersonal contact, and any optional paid features.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of znakomstva.ru.

- The request stayed on znakomstva.ru. It was not redirected to another domain. CLEAR
- Registration is published under REGRU-RU. CLEAR
- DNS for this domain is served by ru., across 2 name servers. NOTED
- The registration is paid up to 2026-11-30. NOTED
- The earliest public archive of this site is from 2000-07-11. CLEAR
- It is hosted on RU-JSCIOT, from a server in RU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about znakomstva.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
