Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2002.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

ZODIAC Executive Search is a corporate recruitment website presenting ZodiaAc as an executive-search specialist for CXO and board-level appointments across India and the Middle East, with services organized around sectors including BFSI, consumer businesses, infrastructure, and industrial or manufacturing companies. Its apparent business model is B2B leadership recruitment and related consulting, supported by client placement or retainer engagements.

Scam/Impersonation Risk

No contradictions were observed across the site and the available reputation checks: there is no indication of phishing, brand impersonation, malicious behavior, or a confirmed blacklist event. The homepage presents a coherent corporate recruitment purpose, while observed browsing showed no login form, hidden sensitive form, wallet interaction, external posting activity, or cloaking behavior. The site's historical and registration signals are consistent with an established web presence, although they do not independently prove the real-world operator's identity.

EVIDENCE

- The homepage describes “ZODIAC Executive Search” and leadership recruitment services, with no red-flag content identified.
- Browser observation recorded 2 successful runs, 0 external XHR requests, 0 hidden forms, 0 wallet-connect runs, and no cloaking.
- Domain registration: 2000-06-07 (~26.22 years old).
- Archive coverage: first seen 2002-02-20, last seen 2025-07-10, with 24 years tracked.

Regulatory Verification Notes

The About, Company, Leadership Team, Services, and Contact sections provide a recognizable corporate-service presentation and identify the business as an executive-search firm, but the available site material does not independently establish the legal entity operating the domain. No licensing or registration number is presented; for this type of recruitment business, that is a disclosure and applicability question rather than evidence of a scam. Available external checks did not identify malicious or suspicious findings, although reputation coverage was partial. The overall evidence is therefore consistent with an established, apparently legitimate website while operator identity remains unverified.

EVIDENCE

- The homepage and services material describe board-level and CXO recruitment across named business sectors.
- The Contact section includes an office address and a business contact channel.
- No licensing authority or license number is stated in the reviewed legal or business pages.
- No broker-dataset match was recorded, and no malicious or suspicious result was identified in the evaluated external checks.

What to Verify Next

Before credential or payment interactions, independently confirm the legal entity behind the recruitment engagement, the identity of the responsible consultants, and whether any applicable recruitment or employment-services registration is required in the relevant jurisdictions. Confirm engagement terms, fees, cancellation or refund provisions, and payment protections through independently sourced contact channels rather than relying solely on details supplied by the website.

EVIDENCE

- The About, Company, and Leadership Team pages are the appropriate locations for reconciling the operating entity and named personnel.
- The Services and Contact pages provide the business context and channels against which an independent verification can be performed.

Summary Verdict

The website has a high-trust, low-risk posture and the available evidence is consistent with an established, apparently legitimate corporate website. That conclusion supports ordinary business interaction, but it is not

independent proof of the real-world operator’s identity.

Infrastructure Integrity

The site is served directly from Unified Layer infrastructure in the United States, without a detected CDN or WAF layer and with a single resolved likely-origin address. This provides less intermediary shielding than mainstream edge infrastructure, but no adverse infrastructure behavior was identified; the hosting arrangement is a technical characteristic, not proof of legitimacy.

EVIDENCE

- Hosted on AS46606 (UNIFIEDLAYER-AS-1 — Unified Layer, US), resolved IP 204.11.59.245.
- No CDN detected; edge IP count 0 and likely origin IP count 1.
- TLS certificate issued by YR1 with DV validation, valid to 2026-10-31T14:50:55+00:00.

Closing Assessment

Normal browsing and routine business evaluation are proportionate to the current assessment; credentials or payments should follow ordinary independent checks of entity identity, applicable requirements, engagement terms, and payment protections.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of zodiaac.com.

- The request stayed on zodiaac.com. It was not redirected to another domain. CLEAR
- Registration is published under BigRock Solutions Ltd.. CLEAR
- DNS for this domain is served by bigrockservers.com, across 3 name servers. NOTED
- The registration is paid up to 2031-06-07. CLEAR
- The earliest public archive of this site is from 2002-02-20. CLEAR
- It is hosted on UNIFIEDLAYER-AS-1, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about zodiaac.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
